Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "platelike" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Guibert (4455478). Guibert shows a drying furnace containing therein hot plates (14, fig. 1), disposed in a plurality of stages in a vertical direction, on each of which is seated a platelike workpiece (12, fig. 1), a gateway for the workpiece, said gateway being disposed on a front side of said drying furnace and being normally left open to face said plurality of stages of hot plates (13, fig. 1); chamber casing disposed on a rear side of said drying furnace (fig. 3), and an exhaust chamber defined in said chamber casing (16, fig. 3), said exhaust chamber comprising a flow dividing

Art Unit: 3749

plate having formed therein a plurality of ventilation holes each facing a gap between said plurality of stages of hot plates (P1, P2, P3, fig. 3), said exhaust chamber being forcibly exhausted by exhaust means (18, fig. 3), said exhaust chamber comprises a plurality of exhaust ports which are disposed in vertical stages for connection to said exhaust means (D1, D2, D3, fig. 3).

Allowable Subject Matter

Claims 3-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to apparatus in general: Miyazaki et al (6,059,196), Stein (5,123,178), Stromqvist (3,261,650), Guibert (4,455,478), Veater (4,043,048).
